Compatible Hardware and Accessories for PatientTouch® Communications for Android for 2.9 and 4.x

_____

patienttouch //®

Device Options and Specifications

The following devices have been certified to be compatible with PatientTouch® Communications for Android 2.9 and above.

Android devices are currently not certified for the PatientTouch Clinical application, however, support for this option is in progress.

All of these devices can be used for shared device and BYOD, however, **PatientSafe Solutions™ is working with vendors to certify specific devices for VoIP.**

Certified Android Platforms: Pie, Oreo, Android 10

PatientSafe Solutions recommends a battery charger and case, however, we have not tested or approved any specific brands.
